Exercise: Movie Shop Black Box Testing—Test Cases and Test Values

In the movie sales and rental shop system, there is a procedure, validateRating, that validates the review rating input by the user. A review rating is an integer value from 1 to 5.

For each of the test categories below, what test cases and specific test values should be used to test whether the validateRating procedure works correctly and accepts only valid rating values?

(a) boundary test cases and values

(b) typical test cases and values

(c) other test cases and values
