EXERCISE: MOVIE SHOP ACCEPTANCE TESTS

The following statements are extracted from the movie sales and rental shop problem statement.

- The system must be able to handle both physical and digital movies.
- It must be able to record which movies are sold and rented and by whom.
- Members … can buy and rent digital movies via the Web.
- A sales clerk should be able to sell and rent physical movies and process the return of rented physical movies.

Restate these requirements in a testable way and group them by functionality.

EXERCISE: MOVIE SHOP ACCEPTANCE TESTS

– The system must be able to handle both physical and digital movies.

~~The system handles the selling of movies~~.

~~The system handles the renting of movies~~.

Too broad and subsumed by subsequent requirements.

– It must be able to record which movies are sold and rented and by whom.

The system records information about who bought a movie.

The system records information about who rented a movie.

– Members … can buy and rent digital movies via the Web.

Member can buy a movie.

Member can rent a movie.

– A sales clerk should be able to sell and rent physical movies and process the return of rented physical movies.
